

SUPPLYING VALVES FOR THE WATER INDUSTRY

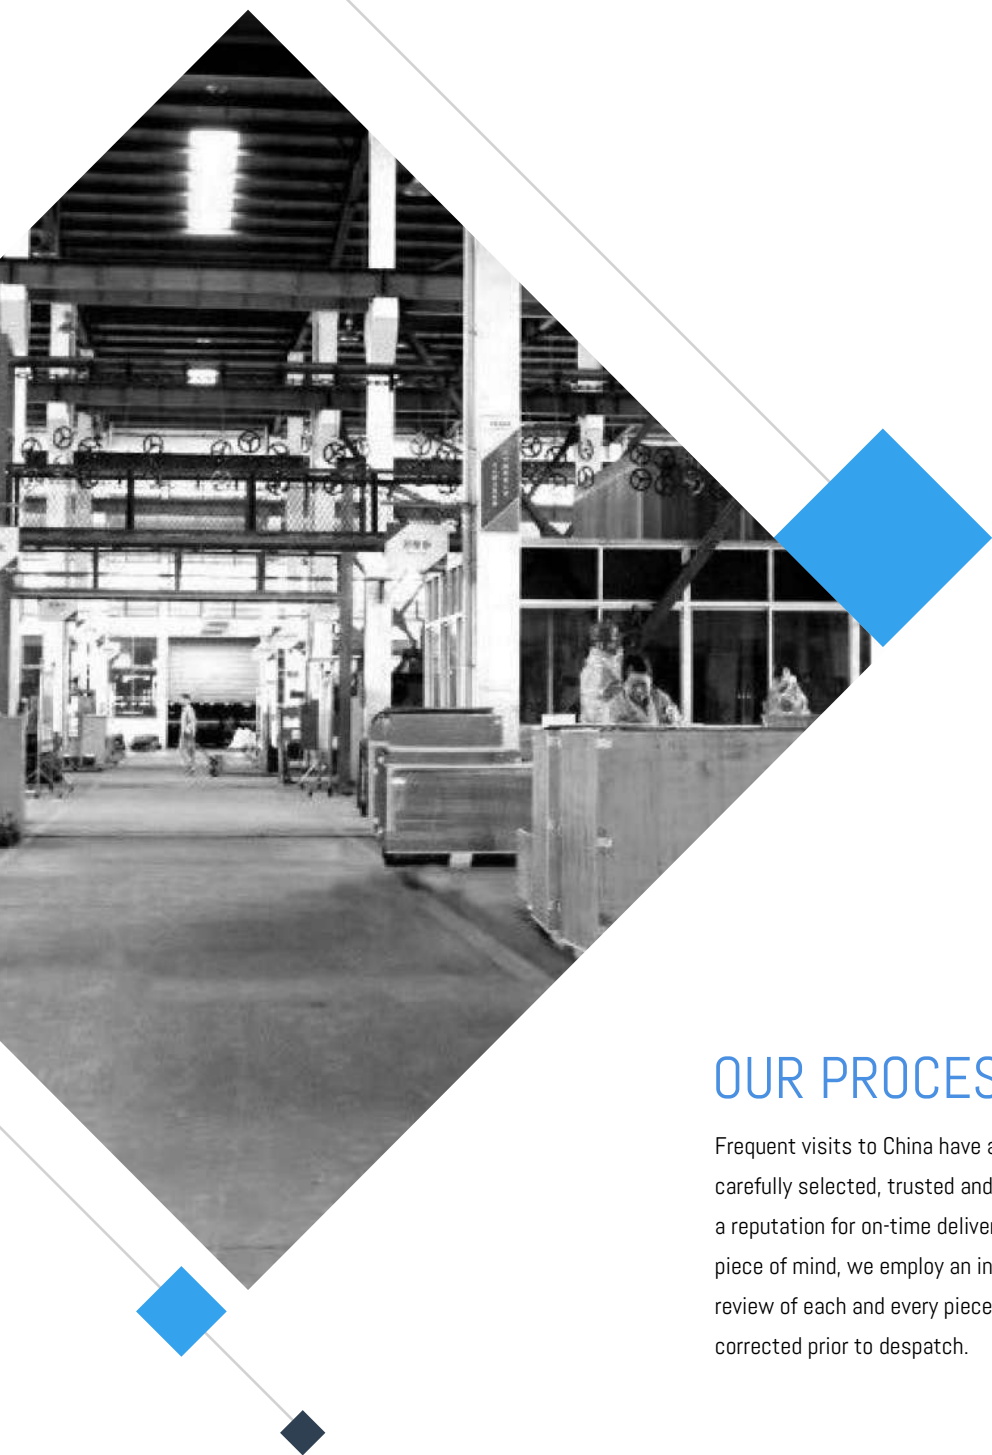

OUR HISTORY

We have over 50 years experience in the valve industry including 40 years in product manufacture and 25+ years supplying valves and fittings to the water sector. We solve your supply issues and source the right valve partner for your business.

OUR METHOD

Where many businesses struggle to establish a line of communication with companies in China, Bryden already have it. By dealing with Chinese suppliers directly through Bryden, communication will be clear at every stage of the order process.

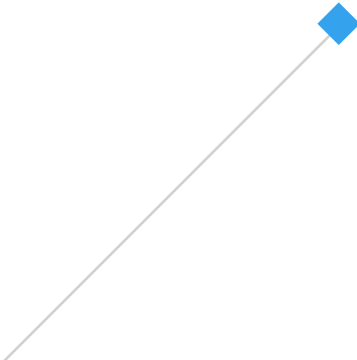

OUR PROCESS

Frequent visits to China have allowed us to build fantastic relationships with carefully selected, trusted and reliable partners. Our accredited suppliers have a reputation for on-time delivery and extremely low failure rates. For further piece of mind, we employ an independent inspector to carry out an exhaustive review of each and every piece in all shipments. Problems are detected and corrected prior to despatch.

OUR INSIGHT

We also have intimate knoweldge of the export market, particularly those in the Middle East and Africa, and can advise customers who aim to develop their company into these areas.

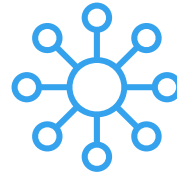

WHY CHOOSE BRYDEN?

PROVEN QUALITY

Our valves have been approved for supply by major UK utility companies and are built to meet European and British standards.

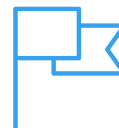

CLOSE TIES TO CHINA

Purchasing products from China can be a bumpy road. The long established relationships we have with our Chinese suppliers make it a smooth ride.

AFFORDABLE PRICES

Extensive knowledge of the supply chain means we are able to control prices, keeping them competitive.

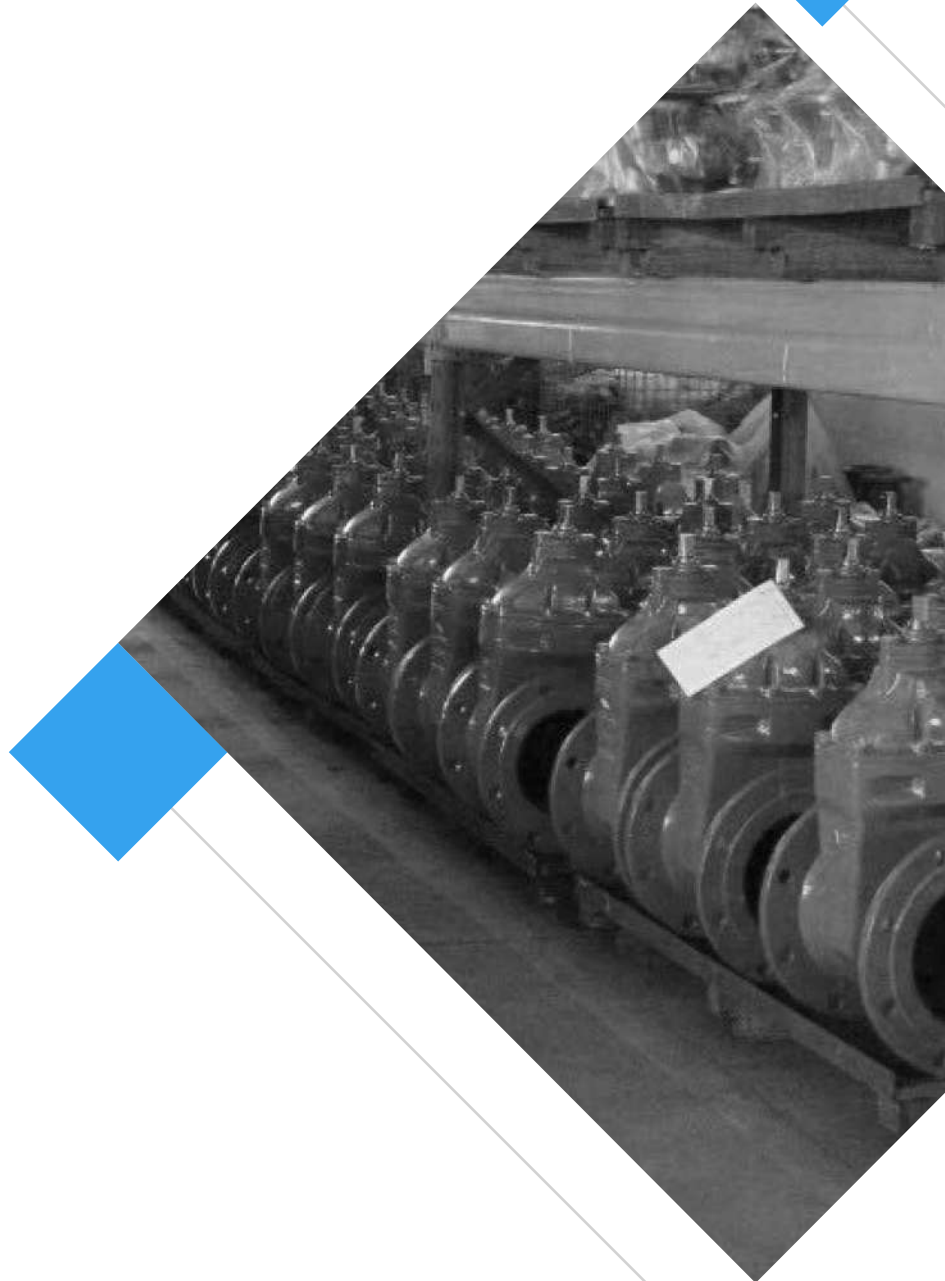

INSPECTIONS

All orders are subject to a rigorous independent on-site inspection co-ordinated by Bryden, problems are eliminated long before despatch.

INSPECTIONS

For each order placed through Bryden, we will coordinate a thorough quality inspection of the goods before they are sent for delivery. The results of the inspection are recorded in an intensive report and provided to our customers before the products even leave the warehouse, so any issues can be flagged up early in the process and fixed long before they arrive in the U.K.

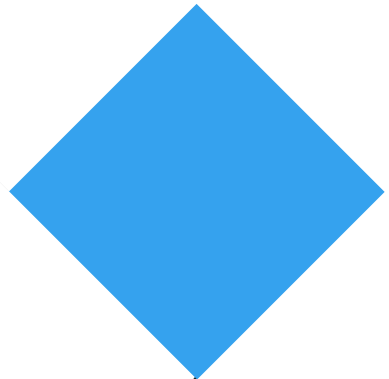

We check product quantities, perform pressure tests, evaluate materials and dimensions and assess appearance and build. We even make sure the packing of the valves themselves is tidy and secure to ensure your order is kept perfectly safe during transit.

OUR PRODUCTS

Our range of quality, certified valves for the water industry includes Gate Valves, Plug Valves, Fire Hydrants, Gearboxes and Accessories.
